

## 2504D Overlocker

### Overview

The Brother Overlocker 2504D, a lightweight, compact machine with carry handle, in your sewing room is a must.

Together with your sewing machine, an overlocker will enable you to construct quality garments and projects with a professional finish. Garment seams lie flatter and look better with an overlock stitch. Plus, home decor projects often suggest the use of an overlocker for rolled hems and secure seams and differential feed.

Features such as the trim trap for catching scraps of fabric and storage of the foot controller when the machine is not being used and thread twist protection and needle plate separation for improved sewing quality makes the Overlocker 2504D ideal for beginners as well as more experienced tailors.

The 2504D Overlocker is designed for finishing the hems and edges of a wide range of fabrics and creating decorative edges.

An uncomplicated machine that is easy to thread. Tension adjustment is also a breeze and remember you have help online with your teacher Joey, at Sew Fabulous.
